REMARKS

An Office Action was received on April 23, 2002, asserting that Applicant's Amendment and Response of February 8, 2002, adds new material to the disclosure contrary to 35 U.S.C. 132, and for failing to fully respond to the prior Office action. Reconsideration of the application as amended, in light of the remarks herein, is respectfully requested.

Claims 8 and 16 originally were rejected under 35 U.S.C. § 112 for containing subject matter which is not sufficiently described in the specification. The specification, at page 15, lines 17 - 21 was amended to clarify the function of the slidable shut off switch. As amended, the specification clearly explained that the switch is manually slidable within one of the columns. However, the Examiner believes that the proposed amendment to the specification adds new material in violation of 35 U.S.C. 132. Therefore, Applicant has cancelled the proposed amendment and has requested substitution of language at page 15, lines 17 - 21 which simply states that the shut off switch can be pre-positioned within one of the vertical columns. This amendment finds support in the original disclosure, both in the specification and the claims, because the switch is described as "slidable". As the switch is slidable it can be positioned.

The Examiner correctly points out that Applicant did not particularly point out how the language of claim 17 distinguishes over the prior art of record within the February 8, 2002, Amendment and Response. Applicant has now cancelled claims 17 - 20, thereby making the February 8, 2002, Amendment and Response of Applicant otherwise fully responsive.
